

Name _____

Date _____

The shortest distance

- Find the shortest distance across this grid.
- You may move horizontally or vertically.

Start

120cm	8m	2m	500cm	24m
400cm	1.5m	17m	420cm	345cm
40mm	56cm	184cm	12.5m	320cm

Finish

Dear Helper

This activity helps your child to total measurements. These measurements are in different units, so it would be helpful to change these into the same unit where possible. If your child finds this difficult, do this together, discussing how many millimetres make a centimetre, and so on. Challenge your child to find the longest route. They may use a calculator if they wish.
